

Why is organ donation important?

with the unconditional
unrestricted grant of

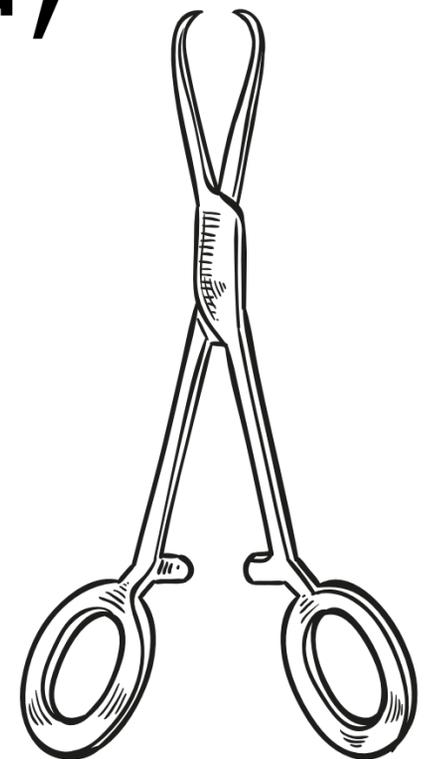

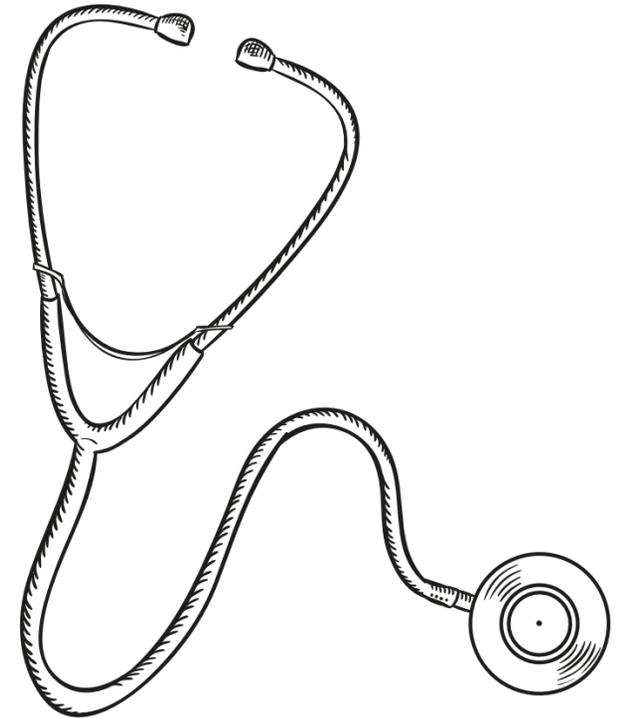

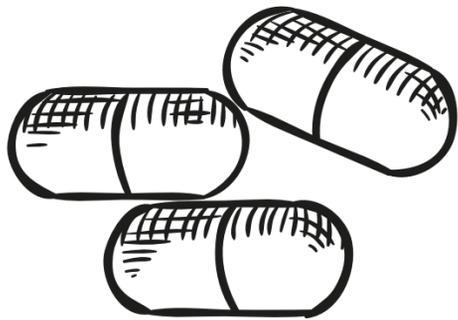

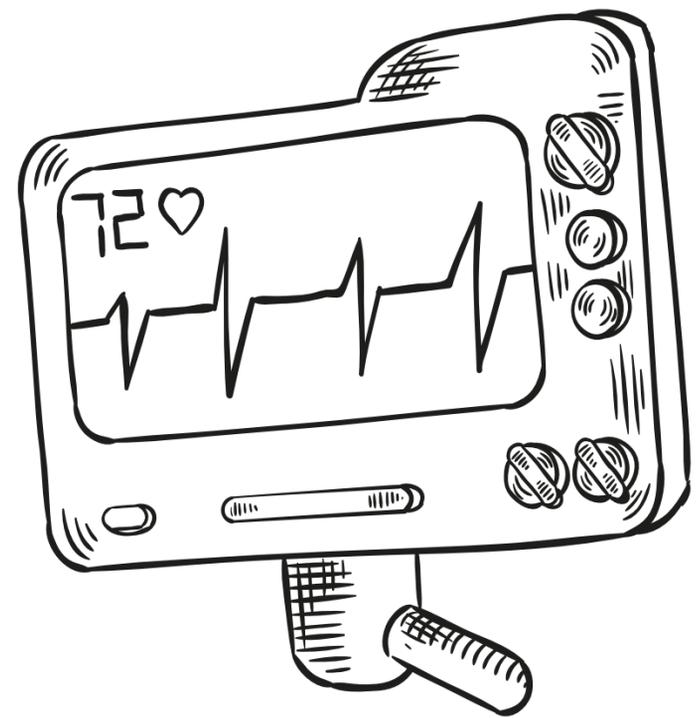

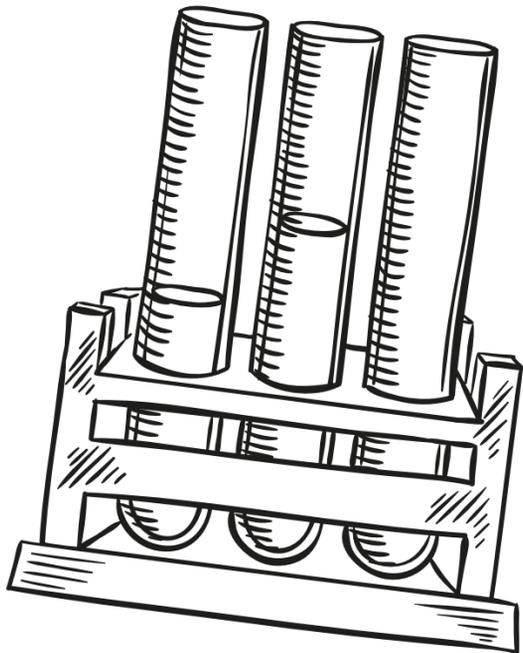

In 2021

20,000

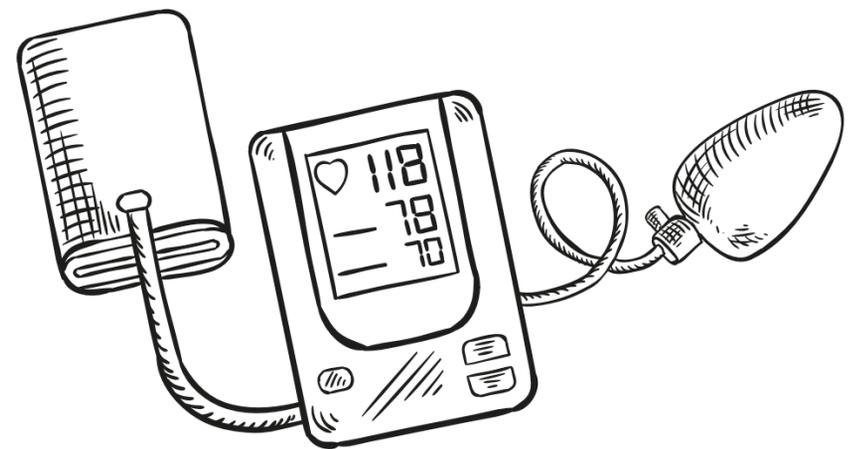

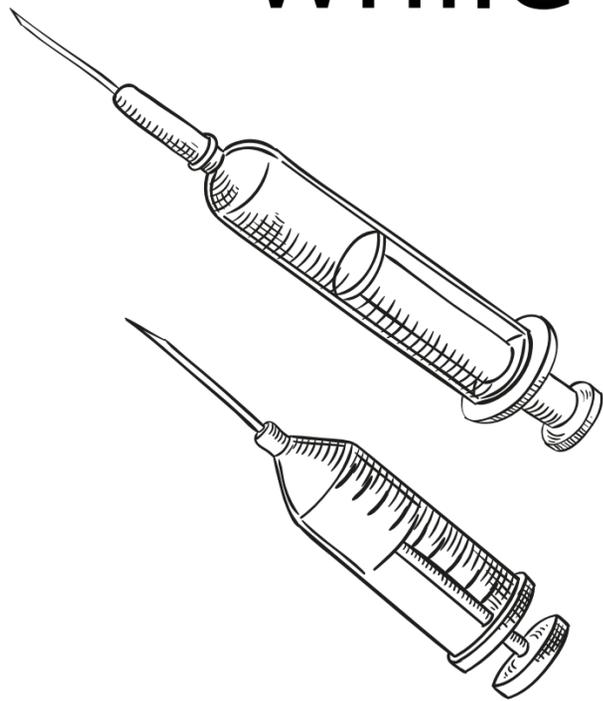

organs were donated,
of which half came
from deceased
organ donors

7,000

people die each year
while on the waiting list

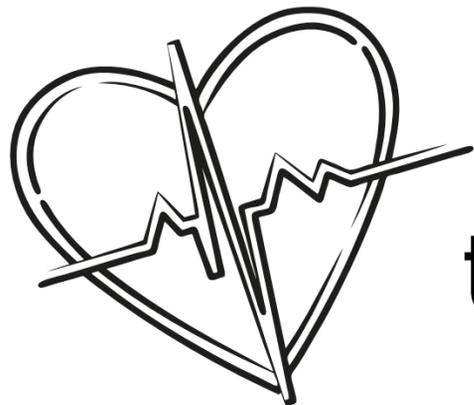

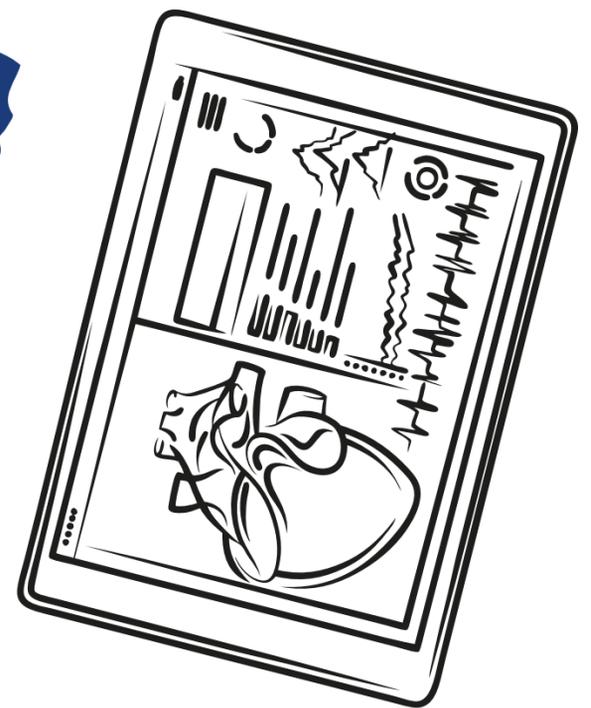

Every single person
can make a difference
when we talk about
organ or tissue donation.

1 donor can:

save **8** lives

through organ donation

& save or improve up to **100** lives

through tissue donation
