

## HORUS Project

# What You Should Know About CMV

13 October 2025 at 12:30 - 13:15 CET

Online – Free to join, registration recommended (scan QR code below)

### About the session

Discover the vital role patients play in clinical studies and transplant care. Hear from experts and patient advocates on cytomegalovirus (CMV), treatment pathways, and empowering self-management.

### Programme highlights:

- **Introduction** – *Colin White* (ESOT): Why patient participation matters.
- **Patient perspectives** – *Aurélie Desseix* (CHU de Bordeaux): Recruitment, treatments, and self-management.
- **HORUS Project** – *Hannah Kaminski* (HORUS project coordinator): Mission and benefits for patients and clinicians.
- **Understanding CMV** – *Sophie Alain* (CNRS): Key facts for patients and its impact on transplant care.
- **Panel & Q&A** – Your chance to engage with the experts.

### Why attend?

- Gain practical tools for self-management
- Understand CMV's role in transplant care
- Learn about innovative research shaping the future

***Open to patients, caregivers, and healthcare professionals.***
